### Significance

This is a rare and extremely well preserved example of a blacksmith shop which were integral parts of many nineteenth century southern farm complexes. The original tools present within the shop, and its continued use for blacksmithing, make it a unique example of the continuity of traditional farming practices. See Site AB1301-A for the relationship of this site to the remainder of the farm complex.

11. (continued) intersection with Abbeville County Road 81, then southwest on Co. 81 1.0 mile to the intersection with Abbeville County Road 93, then south on Co. 93 1.0 mile to the site.

i

Significance This structure is a fine example of a post-civil war homestead dwelling. The front door with sidelights is an unusual feature in the project area, and even more unique is the small cupboard on an exterior wall, where there was previously a porch. This structure was recorded as part of the Hutchison Farm Complex (AB1301), although this house site and associated barn lie outside the acquisition line of the Russell Project.

i

Significance This structure is one of the few that can be positively identified as a post-civil war hired man's dwelling in the project area. It is the only surviving part of a complex of buildings which included a house and a small store, and was associated with other nearby farms, few of which still exist. This structure was recorded as part of the Hutchison Farm Complex (AB1301), although it lies outside of the acquisition area of the Russell Project.

PRINCE CONTINUED: 11. Site Address (Street & No) (Continued)
Road 81, then southwest on Co. 81 1.0 miles to the intersection with Abbeville County Road 93, then south on Co. 93
.4 miles to the site.

significance The saddlenotch log joinery in this structure indicate that it was build CA. 1900. It represents the survival of traditional log construction in the early twentieth century. The structure was part of the larger Harper Farm complex, which originated as an early nineteenth century plantation. The complex includes structures of different periods; illustrating the continual evolution of the Southern farm. Several structures in the complex are of unique architectural character. The complex, associated with the site of Harper's Ferry, played a central role in the economic development and history of the project area.

County Road 81, then southwest on Co. 81 2.9 miles to the site.
